Integral indefind:

$$\int f(n) dn = F(n) + cond \iff \frac{dF(n)}{dn} = f(n)$$
Primitiva
ou anti-derivada

Exemplo:

$$\int z n dn = n^2 + const \iff \frac{d(n^2)}{dn} = z n$$

Velocidade e pricus:

$$V_n = \frac{d\kappa}{dr}$$
 as $\int V_n d\tau = 3\kappa + const$
